

How CAB Companies can make Best Use of the INCOSE Website

Andrew Pickard, Ph.D.
Chief of Improvements and Quality,
Rolls-Royce
Co-Chair, INCOSE Corporate Advisory Board

Did you ever wonder how to find your way around the INCOSE website? This webinar takes you on a tour of the INCOSE public website, www.INCOSE.org and of the members-only website <https://connect.incose.org/default.aspx>.

The public website is managed by the INCOSE Webmaster and does not allow content to be added by individual users. The different methods of navigation around the website are demonstrated, and some pages of particular help to CAB Company members are shown.

The members-only website is based on the Microsoft Sharepoint content management system, which allows different permissions (Read, Contribute, Design and Full Control) to be allocated to different users. The tour starts at the INCOSE Connect home page and then shows you how to get to the CAB Knowledge Center home page. The links from this page are illustrated, and methods of adding content are shown for those who have "Contribute" or higher permissions.

The tour will continue with a detailed look at the INCOSE Products area, the Webinar archive, the CAB Discussion Forum, the CAB Wiki and the member search function. Did you ever wonder what is available on the INCOSE website, how to get to it, and how to contact other INCOSE members? Well, here is your opportunity to find out!

Finally, the tour will show a pilot initiative to create CAB company-specific introductory pages, where your CAB representative will be able to point you at website contents that are of particular relevance to your business.
